The Digestive System

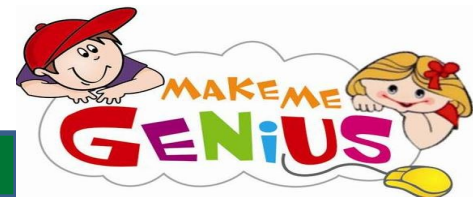

What does the Digestive System Do ?

The digestive system digests the food we eat.

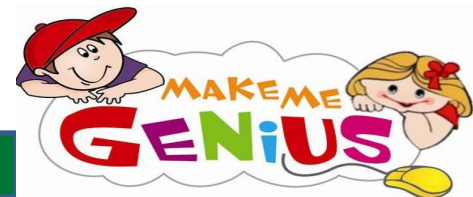

Lets Take A Journey Of The Digestive System.

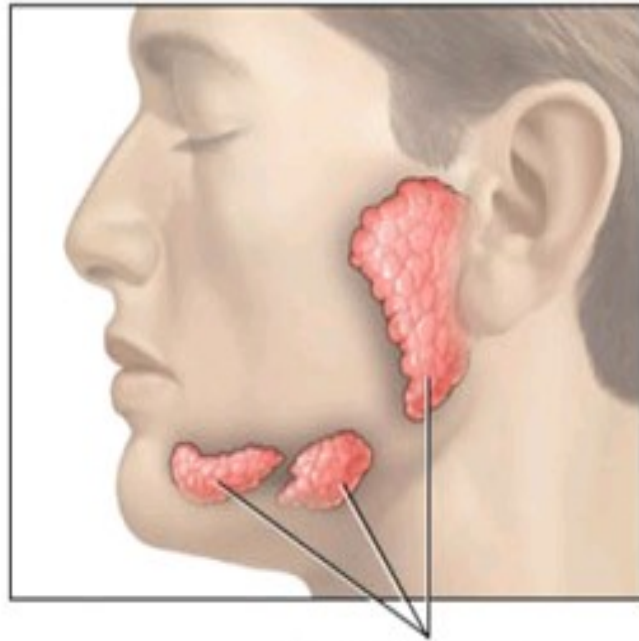

The Teeth

- The **teeth** chew and tear the food into small bits of pieces.

Salivary Glands

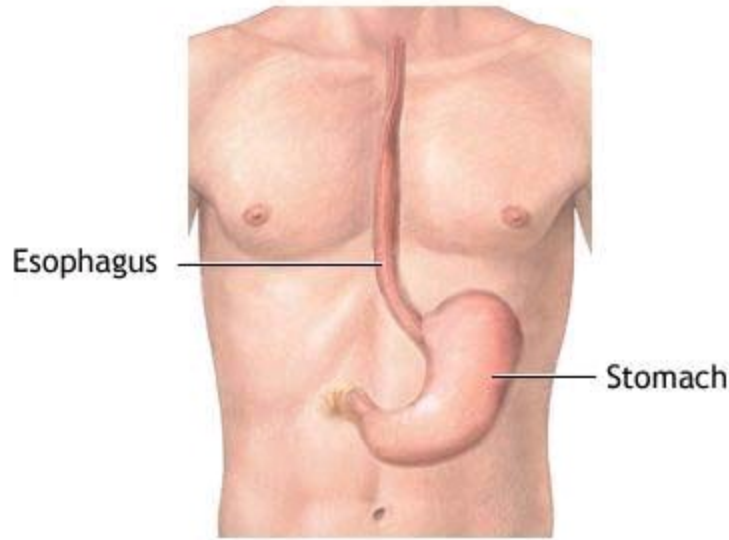

Salivary glands

- They produce liquid like material called **Saliva**. Saliva softens the mouth and starts the breakdown of chewed food.

Oesophagus

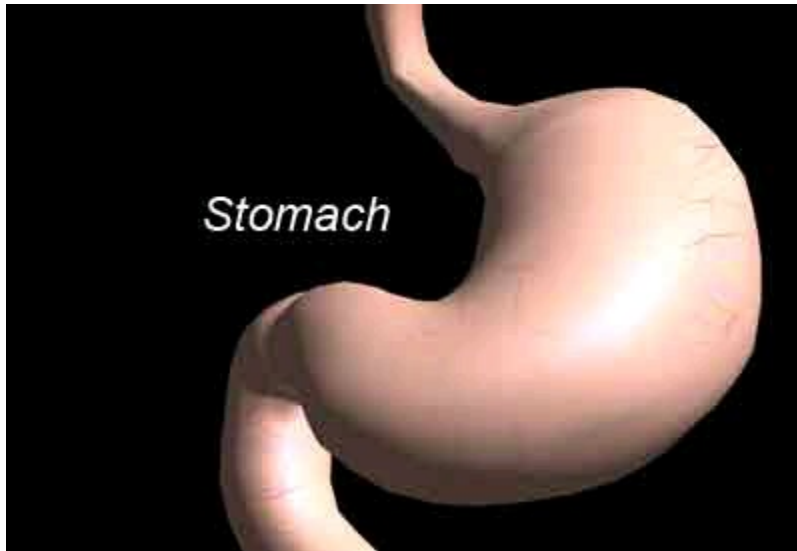

ADAM.

- The **oesophagus** is the tube that carries food, liquids and saliva from your mouth to the stomach.

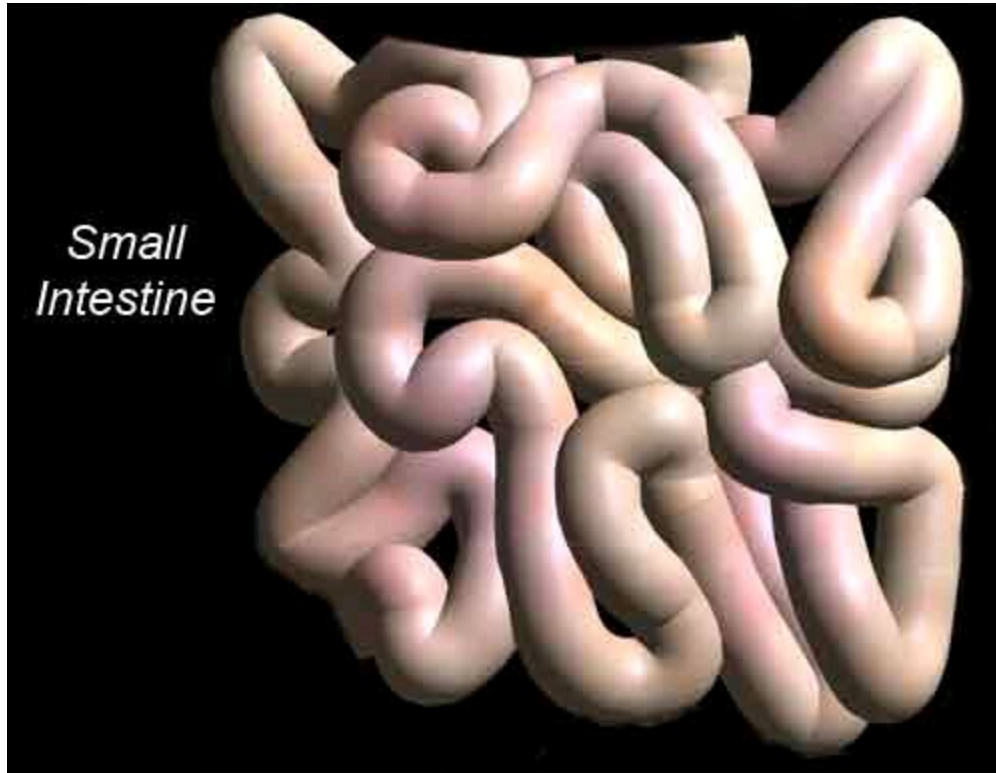

Stomach

- The main function of the **stomach** is to process and transport food.

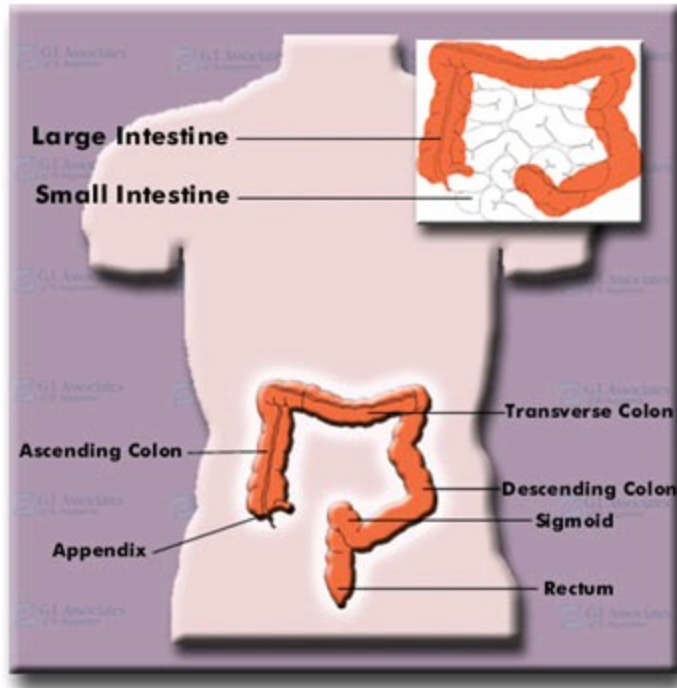

Small Intestine

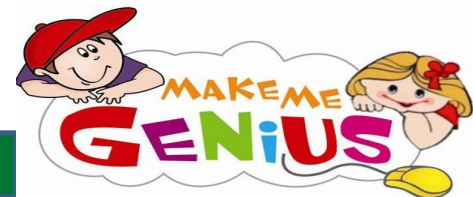

- The **small intestine** digests all the nutrients.

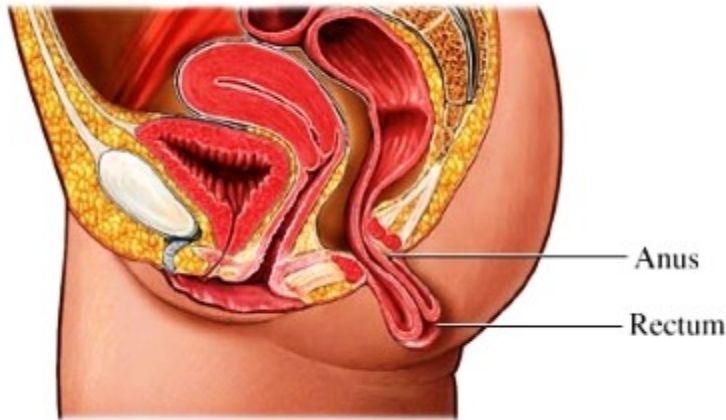

Large Intestine

- Balance water is absorbed in **Large Intestine**
- The large intestine takes out the waste.

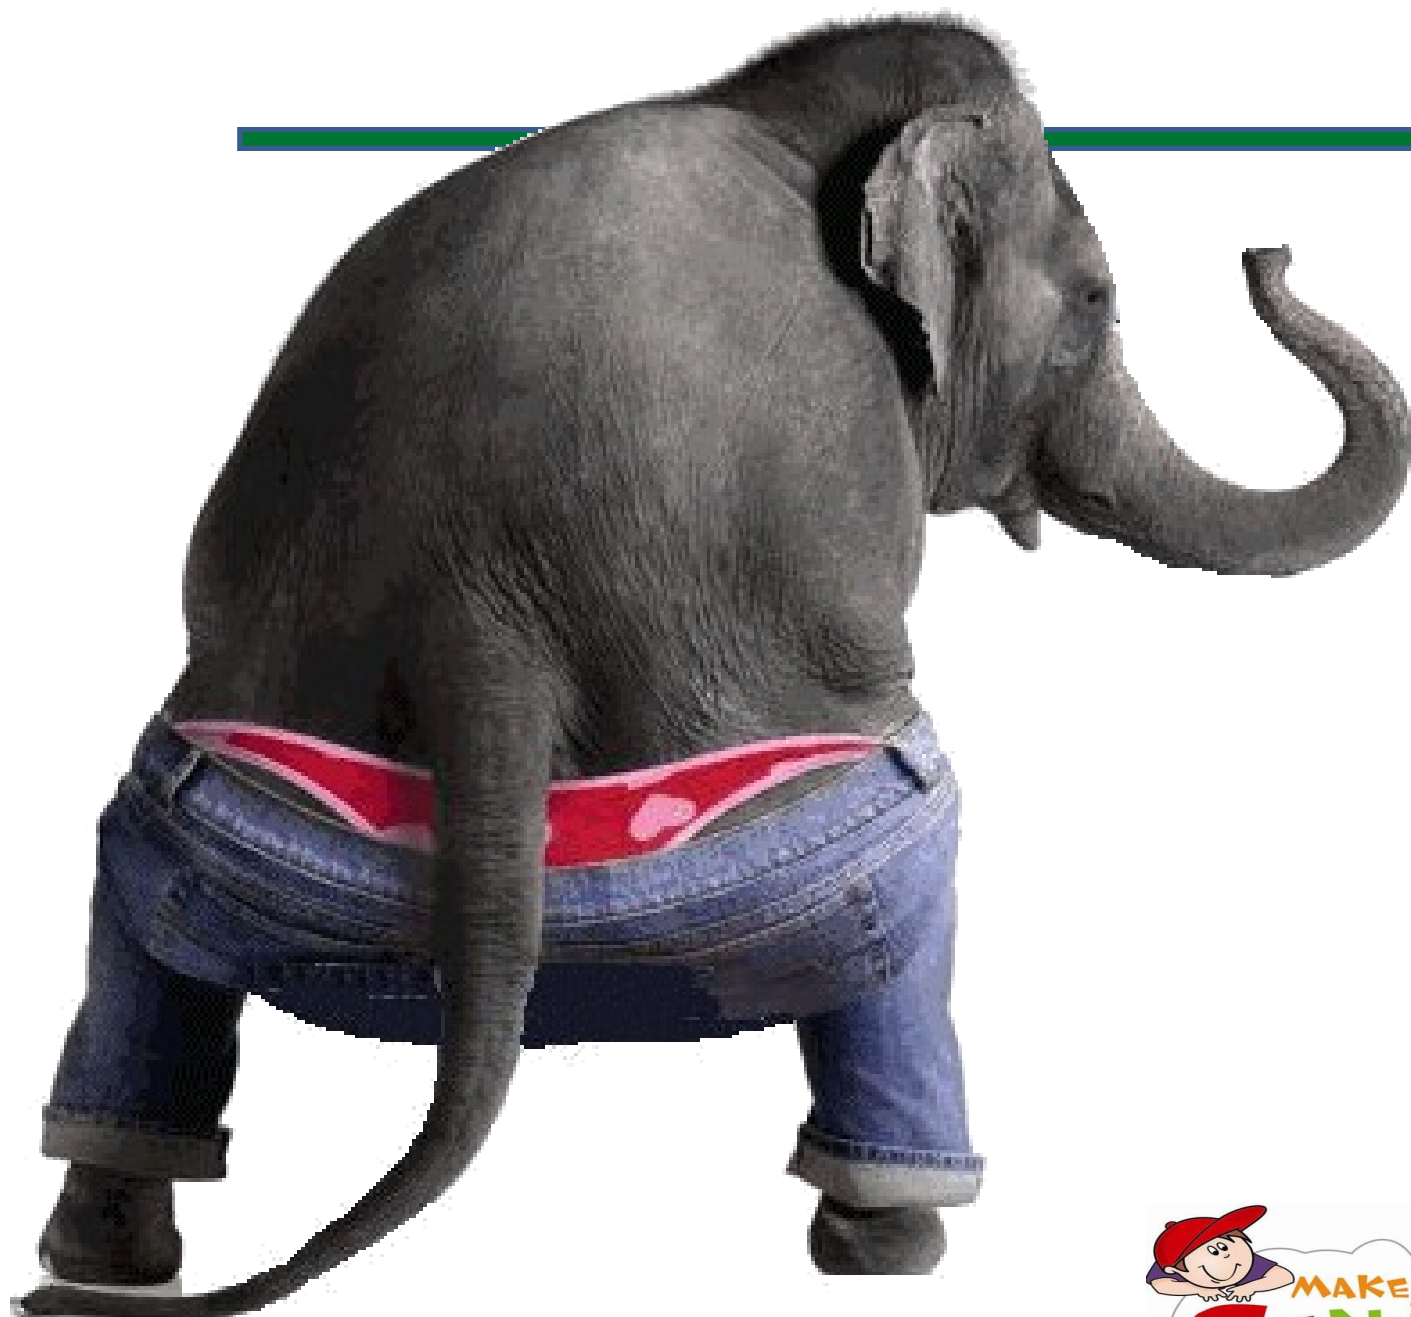

Anus

- The rectum is where feces are stored until they leave the digestive system through the **anus** .

Thanks
